Portable floor screen

Stable, compact 4:3 mobile screen for a fast setting up on the floor or table. The screen is simply pulled out from the bottom casing and hooked to a mounting rod which was folded out beforehand. Can be adjusted to different heights. The screen has a 1.5 cm wide black border for clean masking and to increase the perceived contrast of the image. Fabric-based matte white projection screen with black rear side. Viewing angle is 160°.

Product details:

- Integrated carrying handle.
- Space-saving storing.
- Excellent image position.
