Erklärung Vesa :

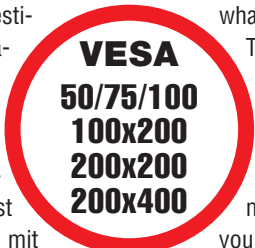

Die VESA-Norm ist ein Befestigungs-Standard von LCD-/Plasma-Geräten, die sich international durchgesetzt hat. Zur einfachen Erklärung was diese Norm aussagt ist es nötig, dass Sie sich Ihre Befestigungsmöglichkeit an der Rückseite von LCD-, TFT- & Plasma-Monitoren ansehen. Sie können die VESA-Norm sehr einfach selber herausfinden. Nehmen Sie den Abstand der horizontalen und vertikalen Gewindebohrung, jeweils mittig in Millimeter gemessen. Ein Beispiel: Der Abstand der Gewindebohrungen horizontal beträgt 150mm, der vertikale Abstand ist 100mm, so haben Sie die VESA-Norm 150x100. Finden Sie mit Hilfe der VESA-Norm einfach die richtige Halterung für Ihr Gerät.

VESA ist ein eingetragenes Warenzeichen ®

Description Vesa:

The VESA standard is a standard used for the mounting of LCD/ Plasma devices, which has prevailed internationally. For a simple explanation to what the standard is, you must take a look at the back of the LCD, TFT and Plasma Screens. It is easy for you to find out the VESA standard of your device yourself. Take the distance between the horizontal and vertical threaded holes. The measurement must be taken from the middle of the holes in Millimetres. For example the distance between the horizontal threaded holes measures 150mm, the vertical distance measures 100mm, so you have the VESA standard of 150 x 100. Use the VESA standard as a simple method to find the right holder for your device.
